

CERTIFICATE OF ANALYSIS

Plasma/Serum Products

Syphilis Serum

Source Material: Serum

Expiry Date: None assigned. Users should determine suitability in their own system or refer to any known collection date.

Product Code: H549-2

Antigen/Marker present: Syphilis

Species: Human

Format: Liquid

Storage Temperature: ≤-15°C. Minimise freeze-thaw cycles

Shipping Temperature: ≤-15°C recommended

Intended Use: For performance analysis and quality assurance, research and further manufacturing

Health & Safety:

Infectious Disease Tests Performed: Material/donors have been tested for the following infectious disease organisms/markers plus any under Test Results Data:

Material/donors tested for:	Result
HBsAg	Negative/Non-reactive
HIV 1/2 Ab/Ag	Positive
Anti-HCV Antibodies	Negative/Non-reactive
Syphilis	Positive

Chemicals: For further information please request a Safety Data Sheet.

Precaution:

Handle as hazardous using appropriate Personal Protective Equipment. Refer to Safety Data Sheet (available on request) for safety information and precautions.

Test Results Data:**Test 1 performed:**

Abbott Syphilis Treponema Pallidum (S/CO)

Test result:

See under "Lot/Donor information"

Lot/Donor information:

Lot #	Date of Collection	Donor Age	Donor Gender	Abbott Syphilis Treponema Pallidum (S/CO)
SE17090-C	25-Aug-2017	66	Not Recorded	2.14
SE17091-C	15-Sep-2017	66	Not Recorded	1.8
SE17092-C	03-Aug-2017	66	Not Recorded	1.61
SE17092-D	03-Aug-2017	66	Not Recorded	1.61
SE17092-E	03-Aug-2017	66	Not Recorded	1.61
SE17092-F	03-Aug-2017	66	Not Recorded	1.61
SE17093-C	27-Oct-2017	66	Not Recorded	2.01
SE17094-C	01-Mar-2018	56	M	1.23

In Logical Biological's Lot Numbering System, the Lot Number is shown before the dash (-). The letter after the dash is the "Tube Letter". Multiple tubes may be from exactly the same Lot, e.g., PL001-A and PL001-B would be tubes from exactly the same Lot.
